

ESafety policy

Principles:

Breakspeare Community Preschool recognises that ICT has an important role in supporting children's learning and development and aids communication with families. We also understand the importance of ensuring families are given information to ensure they are aware of the importance of esafety and are involved in the education and guidance of their children.

Photographs of children engaged in a variety of activities and experiences can provide valuable evidence. To promote safer use of ICT, it is essential that when working with children the taking or recording of images safeguards the privacy, dignity and well-being of children and their families.

EYFS Commitments:

A Unique Child	Positive Relationships	Enabling Environments	Learning and Development
1.2 Inclusive practice 1.3 Keeping Safe	2.1 Respecting each other 2.2 Parents as partners	3.3 The learning environment	

The designated person responsible for esafety is Amanda Lacey.

Data Storage

The computers in the office and Financial Administrator's computer (off site) all have hard drive locks and can only be opened with passwords.

Our files are stored on Dropbox which is password protected. Children's initials are used where possible and documents are password protected before being emailed to staff. Any documents relating to child protection are password protected.

Our registrations system is web based and can only be accessed with a password and memorable information.

The office computers have a lock screen and password. These are used when there are visitors or parent help left in the office to prevent unauthorised access to the system.

Staff are aware of their responsibility to protect the personal data of the children at the setting.

Acceptable Use:

Registered Charity No: 1130840
School Mead, Abbots Langley, WD5 0LB
01923 274483

The registered person has overall responsibility for ensuring that online safety is considered an integral part of everyday safeguarding practice.

The Senior Designated Person for Safeguarding has relevant, current and practical knowledge of safeguarding, child protection and online safety. They will ensure that the Health and Safety and Esafety policies are implemented, that staff have up to date information regarding online safety, clear reporting lines are available to staff, parents and children, that online safety is included in the planning where appropriate and that a safe ICT learning environment is promoted and maintained.

All staff are asked to sign and abide by our Acceptable Use Policy.

Parents:

We encourage all parents to educate and guide their child to use the technology and the internet safely.

Parents helping during preschool sessions are asked to keep all personal belongings, including mobile phones in the office or adult toilet for the duration of their visit.

Parents are asked to finish phone calls before they enter preschool to drop off or collect their child.

Photos taken for purely personal use are exempt from the Data Protection Act. Parents, friends and family members CAN take photographs and videos of children and friends participating in Preschool activities providing these images are not uploaded to the internet or shared on social media platforms. If this is the intent, the parent must get permission from each child's parent before publishing the photo(s).

Parents are requested to accept the following statement on the registration form to indicate their understanding of the policy.

'We will support Breakspeare Community Preschool's approach to online safety and not deliberately upload or add any image, video, sound or text that could upset or offend any member of our community'

If the setting policy is not adhered to the action will be reported to the management committee and further action taken.

Procedures for using Images:

Photographs of children are only to be taken using the preschool cameras which remain on the premises. They are downloaded onto the preschool's secure system to be printed off and then deleted from the system. They are not sent off site to be printed and the cameras remain on site at all times. Images are not transferred to any other device (e.g. USB, mobile device) Images are uploaded onto the blog only with parental permission

When parents and carers complete the registration form, they are asked for their written consent for photographs to be taken for the purpose of recording observations which are then placed in their

child's profile. They are also asked for consent for photographs of their child to be used on the preschool website, mainly for the purposes of the blog which provides an update of the activities taking place at preschool. We explain that their child's name is never used and all images will show your child and preschool in a positive light. The registration form is stored in the child's personal file.

Permission for images to be used for official preschool use other than developmental profiles is sought specifically with each family and appropriate consent sought. This information will be stored in each child's file. For images to be released to the media, as well as parental consent, advice may be sought from Hertfordshire County Council's Press Office.

No images of Children who are Looked After, under wardship or involved in family law cases will be used for any reason other than developmental profiles. Adults need to be sensitive to children who appear uncomfortable and be alert to the potential for such activities to lead to misunderstandings.

It is not appropriate for staff/volunteers/students to take photographs of children for their own personal use.

Permission will be sought from staff/volunteers and students before their images are taken and used for any reason.

Staff/volunteers and students at Breakspeare Community Preschool will:

- Be clear about the purpose of the activity and what will happen to the images
- Be able to justify images of children in your possession
- Ensure the child understands why the images are being taken and that they are appropriately dressed
- Only use equipment provided or authorised by the setting
- Report any concerns about inappropriate or intrusive images found
- Ensure you have parental permission to take and/or display photographs
- Keep personal technology in the office during session times
- Not display or distribute images without consent
- Not use images that could cause distress
- Not use personal ICT equipment, mobile phones unless with specific permission
- Not take images 'in secret' or images in situations that could be construed as being secret.

Access to Inappropriate Images and Internet Use

There are no circumstances that will justify adults possessing indecent images of children. Accessing, making and storing indecent images of children on the internet are illegal. Adults who are involved in this activity will be viewed as a threat to children and will be subject to a criminal investigation that if proven will result in them being barred from working with children.

Adults should not use equipment belonging to the setting to access any information/images that may upset or offend any member of our community nor should personal equipment containing such images be brought into the workplace.

Where inappropriate images are found, this must be reported immediately via the preschool leader (or deputy preschool leader if the leader is the subject of the concern) who will alert the Police and/or the Local Authority Designated Officer (LADO).

Adults who discover such images should not attempt to investigate the matter themselves as this could compromise an investigation.

Communication with Children/parents through technology:

The setting appreciates the value of ICT in communicating with families outside our opening hours and we endeavour to respond to preschool issues brought to our attention through technology as quickly as possible.

Communication between children and adults should take place within clear and explicit professional boundaries. This includes the use of technology such as mobile phones, text messaging and websites such as Facebook, Twitter, Pinterest etc.

Staff must exercise caution when using information technology and be aware of the risks to themselves and others. Regard should be given to the preschool's E-Safety at all times both inside and outside of work. Staff must not engage in inappropriate use of social network sites which may bring themselves, the preschool, preschool community or employer into disrepute. Staff should ensure that they adopt suitable high settings on any personal profiles they may have.

Staff should ensure that all communications are transparent and open to scrutiny. There is a need to be cautious to avoid any possible misinterpretation of motives or behaviour.

Communication with other professionals through technology:

- Staff send data using password encryption
- Use children's initials where possible
- Only use Preschool technology or approved personal technology to send/receive data concerning children.

Staff/volunteers/students at Breakspeare Community Preschool:

- Only use equipment provided by the setting to communicate with parents/children
- Only make contact with children for professional reasons
- Only provide parents/carers with preschool contact details, not personal contact details.
- Support Breakspeare Community Preschool's approach to online safety and not deliberately upload or add any language, image, video, sound or text that could upset or offend any member of our community.

Reporting concerns:

In the event that a member of staff or parent has any concerns regarding the behaviour of a staff member or child which they believe may be inappropriate or concerning in any way, they should report their concerns to either the Preschool Leader or Deputy Preschool Leader. An Online Incident Report will then be completed and passed to the Preschool Leader and Chairman of the Management Committee.
